EDUCATION

Johns Hopkins University

M.S. in Artificial Intelligence

2026 – 2029

Baltimore, MD

University of California, Santa Cruz

B.S. in Computer Science | GPA: 3.85/4.0, Highest Honors

March 2025

Santa Cruz, CA

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, SQL, HTML, CSS **Frameworks & Tools:** Spring Boot, Docker, Kubernetes, Jenkins, Git

Data & ML: NumPy, Pandas, Matplotlib, Scikit-learn, Seaborn **Platforms:** ServiceNow, Firebase, py4web

EXPERIENCE

L3Harris Technologies — Associate Software Engineer

June 2025 – Present

- Built and extended **Spring Boot** plugins and services, enabling modular functionality and deployment across environments.
- Developed a plugin in collaboration with an external team, coordinating design, integration, and deployment alongside internal teammates.
- Deployed services to a **Kubernetes**-clustered environment, supporting scalability, reliability, and consistent configuration.
- Created **Docker**-based local development environments, including mock databases, to enable safe testing and faster iteration.
- Built, tested, and deployed services using existing **Jenkins CI/CD** pipelines following **Agile** development practices.

Asurion — Software Engineer Intern

June – September 2024

- Enhanced the **ServiceNow** platform by repairing forms, implementing continuous integration practices, and adding new workflows, resulting in a **50% increase in efficiency** and improved user experience.
- Designed forms on the **ServiceNow** platform, with hands-on experience managing the Configuration Management Database (**CMDB**) and workflows.
- Implemented a custom application to streamline call-center workflows, integrating **Observe.AI API** to automate agent performance analysis and feedback loops.
- Conducted in-depth analysis and developed innovative solutions for growth, ultimately winning the audience vote at the company innovation challenge.

Cornell Tech — Breakthrough Tech AI/ML Fellow

May 2024 – January 2025

- Completed Cornell's Machine Learning Foundations Course, mastering essential AI/ML and data analysis concepts through project-based learning and assessments.
- Analyzed the Airbnb NYC dataset using **decision tree** and **KNN** models to refine feature selection and optimize hyperparameters, enhancing overall model performance.
- Collaborated in cross-functional teams and received direct mentorship and technical feedback from **Google Data Scientists** and Machine Learning Engineers.

PROJECTS

PostNote Web Application

September – December 2023

- Developed a full-stack web application for sharing notes featuring course integration, note upload/download, and peer collaboration using **Dart**, **Flutter**, and **Firebase** for backend, database, and authentication.

Task Management Web Application

March – June 2024

- Implemented a task management app using **py4web**, **JavaScript**, and **Python** with features for task creation, assignment, comment management, and role-based editing, ensuring a structured user hierarchy.

LEADERSHIP

Space Foundation — Space Ambassador

August 2025 – Present

- Delivering hands-on STEM and space science instruction in Space Foundation Discovery Center labs, introducing students to aerospace systems, physics, and engineering fundamentals.
- Served as a judge for the National Space Sustainability Competition, evaluating student projects on innovation, feasibility, and long-term impact.
- Recognized as New Volunteer of the Month for leadership, initiative, and educational impact.

UCSC Google Developer Student Club — Solution Challenge Coordinator

December 2021 – March 2025

- Organized, taught, and managed **25 team projects** for the Solution Challenge; taught technical workshops, managed internal operations, and fostered a collaborative learning environment.
