

Roma Solapurkar

romasolapurkar14@gmail.com | (408) 807-7321 | linkedin.com/in/romasolapurkar | github.com/rsol1225

EDUCATION

Johns Hopkins University | M.S. in Artificial Intelligence | Baltimore, MD | 2026 – 2029

University of California, Santa Cruz | B.S. in Computer Science | GPA: 3.85/4.0, Highest Honors | March 2025

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, SQL, HTML, CSS

Data & ML: NumPy, Pandas, Matplotlib, Scikit-learn, Seaborn, PyTorch

Frameworks & Tools: Spring Boot, Docker, Kubernetes, Jenkins, Git

Platforms: ServiceNow, Firebase, py4web

CERTIFICATIONS

CompTIA Security+ | CompTIA | 2025

Machine Learning Foundations | Cornell Tech | 2024

Introduction to AI Agents | DataCamp | 2026

EXPERIENCE

Associate Software Engineer

June 2025 – Present

L3Harris Technologies

- Built and extended Spring Boot plugins and services within a microservice architecture, enabling modular functionality and deployment across environments.
- Developed a plugin in collaboration with an external team, coordinating design, integration, and deployment alongside internal teammates.
- Deployed services to a Kubernetes-clustered environment, supporting scalability, reliability, and consistent configuration.
- Created Docker-based local development environments, including mock databases, to enable safe testing and faster iteration.
- Built, tested, and deployed services using Jenkins CI/CD pipelines following Agile development practices.
- Integrated Grafana API into the existing system to programmatically retrieve and surface platform metrics, improving observability across services.

Software Engineer Intern

June – September 2024

Asurion

- Enhanced the ServiceNow platform by repairing forms, implementing CI practices, and adding workflows, resulting in a 50% increase in efficiency.
- Implemented a custom application to streamline call-center workflows by integrating Observe.AI API to automate agent performance analysis and feedback loops.
- Won audience vote at the internal innovation challenge for a solution developed through in-depth analysis and original thinking.

Breakthrough Tech AI/ML Fellow

May 2024 – January 2025

Cornell Tech & Google

- Developed an ML model using NLP, deep learning, and Google Trends data for precise search query ranking predictions.
- Analyzed Airbnb NYC dataset using decision tree and KNN models, refining feature selection and optimizing hyperparameters to enhance model performance.
- Collaborated in cross-functional teams with direct mentorship from Google Data Scientists and Machine Learning Engineers.

PROJECTS

AI Research Agent

2025 – Present

- Building an AI research agent using the ReAct (Reasoning + Acting) prompting framework; model iteratively reasons, acts, and reflects to complete complex tasks.

Task Management Web Application

March – June 2024

- Implemented a task management app in py4web, Python, and JavaScript with org-aware role-based editing, task lifecycle states, and a hierarchical manager chain.

PostNote Web Application

September – December 2023

- Developed a full-stack note-sharing app with course integration, upload/download, and peer collaboration using Dart, Flutter, and Firebase.

LEADERSHIP

Space Ambassador

August 2025 – Present

Space Foundation

- Deliver hands-on STEM and aerospace instruction in Discovery Center labs; judged National Space Sustainability Competition; recognized as New Volunteer of the Month.
- Bridged L3Harris Technologies and the Space Foundation during Engineers Week (EWeek), coordinating cross-organizational engagement to connect industry professionals with STEM education initiatives.

Solution Challenge Coordinator

December 2021 – March 2025

UCSC Google Developer Student Club

- Organized and managed 25 team projects for the Solution Challenge; led technical workshops and internal operations.
